## Machining

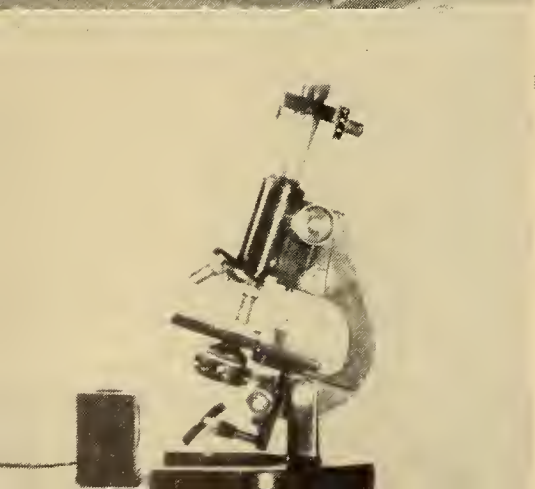

## Spinning

## Weaving

## Analysis

## Research

In this particular year of 1941, the demand for machinists has been tremendous, and New Bedford Textile School has been hard pressed to produce machinists to fill the vacancies which are open at this moment. The shop has to turn out the spindles for the spinning of yarns such as seed hairs from plants of the genus *Gossypium*, the hair of animals, synthetic fibres such as nylon, vinyon, lanital, rayons, and numerous others.

These yarns in turn fill the shuttles which weave the cloth—cloth which is used by mankind as a protection against weather, a protection which would be inconceivable in a world wholly independent of textiles.

From the looms the cloth passes to the finishing department, which introduces the chemist. The chemist is usually found working over oddly shaped apparatus such as flasks, beakers, burettes, test-tubes, and the like. Analytical balances also play an important part in the analysis of chemicals.

The microscope has made an important niche for itself in the textile field. Here we can see an image magnified hundreds of times. We make use of this in the detection of fibres.

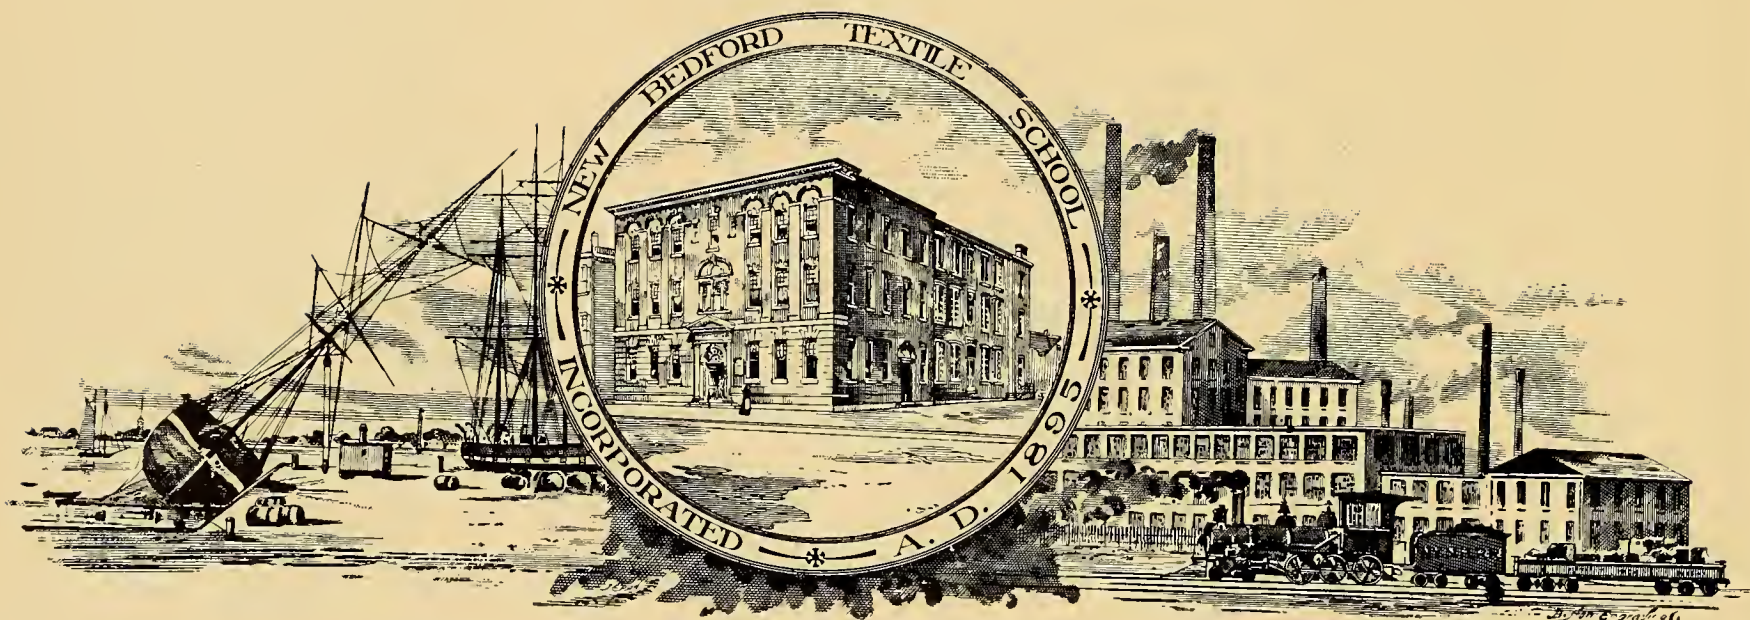

These therefore are the tools which make New Bedford Textile School what it is today. Considering the three years which the class of 1941 has spent at our alma mater, we are proud to present the fine record which the school has made to the outside world.

ANTONE RODIL .....	<i>Warp Preparation and Weaving</i>
ADAM BAYREUTHER .....	<i>Machine Shop</i>
MALCOLM H. RICHARDSON .....	<i>General</i>

## *. . . New Bedford Textile School*

¶ Theoretically and practically the New Bedford Textile School is at the top of the list. If academic subjects might be introduced here, there would be no better school of its kind to be found, as a B.S. degree would increase its popularity and student body. However, what there is to be found here is not to be looked down upon.

¶ There have been, until a few years past, three main day curriculas; namely, Cotton Manufacturing, Chemistry, Dyeing and Finishing, and Mechanical Course. For the past few years the Rayon Course has been gaining in popularity and this year a Girls' Course was started which considerably enlarged the "coed" attendance.

¶ The Cotton Manufacturing Course acquaints the student with the manufacture of yarn and the subsequent weaving of cloth from this yarn. The first two years are spent in acquiring the foundation of cotton manufacturing and the allied subjects. The third year is spent in making and weaving originals. Some microscopy is also taught so as to give the students some knowledge in identifying fibres. Three years of designing and analysis are also included in this course.

¶ The Chemistry, Dyeing and Finishing Course is excellent for anyone who wishes to adopt either or all of these for his vocation. The first two years include a basic training for Chemistry and Dyeing. The third year is more advanced and includes the Finishing of Fabric. Many practical subjects as machine shop practice, economics, microscopy, etc., are included in this course.

¶ The Mechanical Course is recommended for mechanically-minded individuals. It is a two year course consisting principally of machine shop practice, drafting and electricity.

¶ The Rayon Preparation Course recently incorporated in the school, gives complete instruction in Rayon Preparation and Analysis, Weaving and Original Patterns as well as designing and other interesting subjects.

¶ The new Girls' Course which is new to the school this year trains the girls to be laboratory technicians, designers, etc. The course is of two year duration.

¶ New machinery for the school is helpful to the student as it acquaints him with the newer methods of weaving, yarn preparation, etc. The chemical half of the school is in hopes that the laboratory will be renovated during the summer. This will be a great improvement and will facilitate the working conditions.

JOHN E. FOSTER

## *Dedication*

SINCERITY in helping others, sincerity in talking with others, sincerity in laughing with others, these are some of the finest attributes a man may possess. To a man of these qualities, to a man who is never too busy to listen to the problems and ambitions of his students or too occupied to enjoy himself with these students, to John E. Foster the Class of '41 is happy to dedicate this issue of The Fabricator.

GEORGE WALKER, Principal

## *In Appreciation*

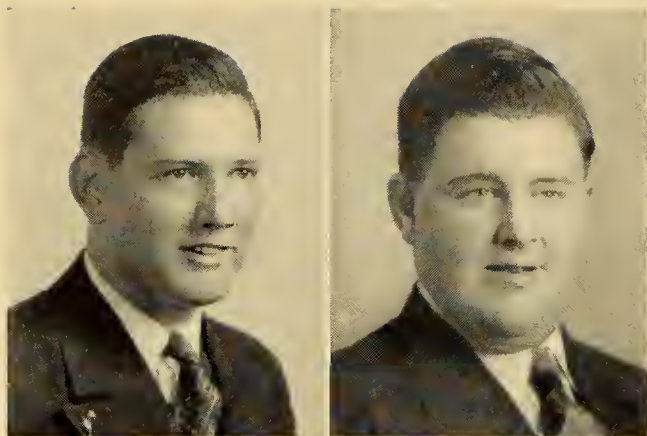

The Graduating Class of 1941 takes this opportunity to pay tribute to our recently-retired professor and sincere friend, Fred E. Busby. He has faithfully served the students of this school for the past twenty-two years launching many promising careers in the textile industry. He has been a counselor and benefactor. So, we, his last class, unite with our predecessors in thanking him for his services. We hope to prove our gratitude by being always a credit to his efforts.

PERSONALITIES . . .

RALPH E. HAWES  
*Editor-in-Chief*

## CLASS OFFICERS

### NELSON B. ARMITAGE

Chemistry

Phi Psi

*"Born with the gift of laughter."*

Nel's interpretation of the *Skaters' Waltz* puts Nijinsky to shame. For an encore he renders *Tiptoe thru the Tulips* or *Back in the Saddle Again* to the delight of his classmates.

Activities: Chairman of Cap and Gown Committee.

### HOWARD ARNOLD

Rayon

Delta Kappa Phi

*"The mirror of all courtesy."*

Howie is the South's representative to Tech. The cold weather up here isn't to his liking, but he has made many warm friends.

### JOHN J. BARTER

Chemistry

Delta Kappa Phi

*"Silence is Golden."*

Johnny goes along in his quiet, unassuming way, and manages to get his work done in spite of outside interference, especially on Wednesday afternoons.

Activities: Golf 1, 2, 3; Basketball 2, 3.

## JAMES F. CAIRNS

Chemistry

Delta Kappa Phi

*"He who laughs last . . ."*

One of the Three Musketeers who intend to tear New York apart, Jim finds time between experiments to bore the rest of the class with his long-winded, pointless jokes.

Activities: Baseball 1, 2; Prom Committee.

## EDMUND CORREIA

Mechanical

Phi Psi

*"It pays to advertise."*

Ed should have been given a double promotion in drafting. He is always three weeks ahead of the rest of the class. Fast fellow this Correia, in more ways than one.

Activities: Advertising Mgr. Fabricator.

## EVERETT W. COUNSELL

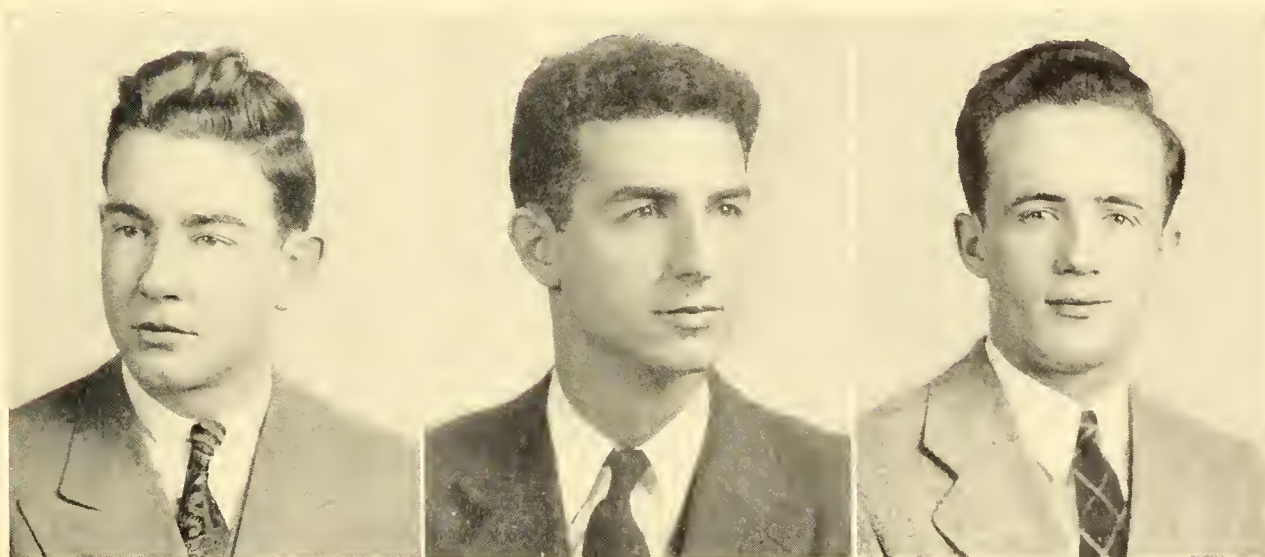

Chemistry

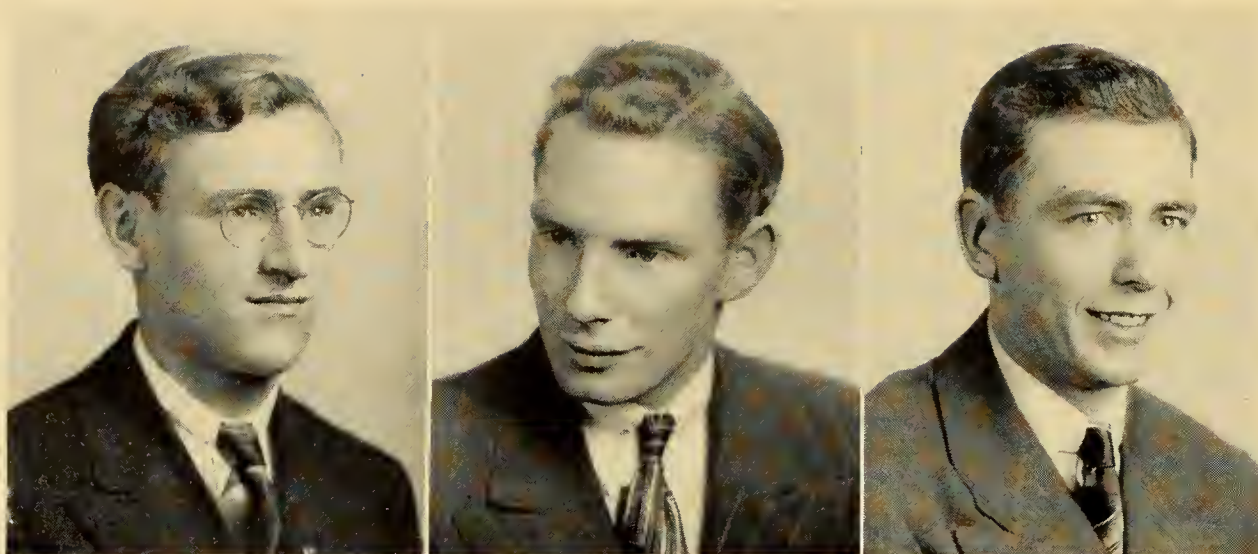

Phi Psi

*"Better late than never."*

Pride and joy of one girl, but a source of irritation to the five fellows whom he brings to school late almost every day.

Activities: Soccer 2, 3; Baseball 1. Secretary Phi Psi

## GEORGE DABROWSKI

Chemistry

Delta Kappa Phi

*"Let George do it."*

The "Cry of Warsaw" is famous by now. George finds favor with many fellows who are low on funds and have a heavy date in the offing. What if his interest rates are high.

Activities: Tennis 1, 2, 3; Basketball 3.

## JOHN FERDINAND

Mechanical

*"Garrulous to the last."*

He's always willing to give the girls a break, but they never give him one when he yells, "Hi ya, babe."

Activities: Baseball 1, 2, 3; Soccer 2, 3. Sports Editor Fabricator.

## FRANCIS FREY

General

Phi Psi

*"Fling away ambition."*

An able student and a well-liked one, Fran has the natural ability to succeed at any job.

Activities: Soccer 1, 2, 3; Tennis 1, 2, 3. Class Secretary 3. Phi Psi Secretary.

## ANDREW W. GOODWIN

Chemistry

Delta Kappa Phi

*"A day for work; an hour for sport."*

Andy is just about tops in both studies and athletics;  
a veritable Superman and Musketeer Number Two.

Activities: Baseball 1, 2, 3; Basketball 2, 3. Procon-  
sul D. K. Class President 2.

## ALFRED HARRIS

Mechanical

*"Joy is Wisdom."*

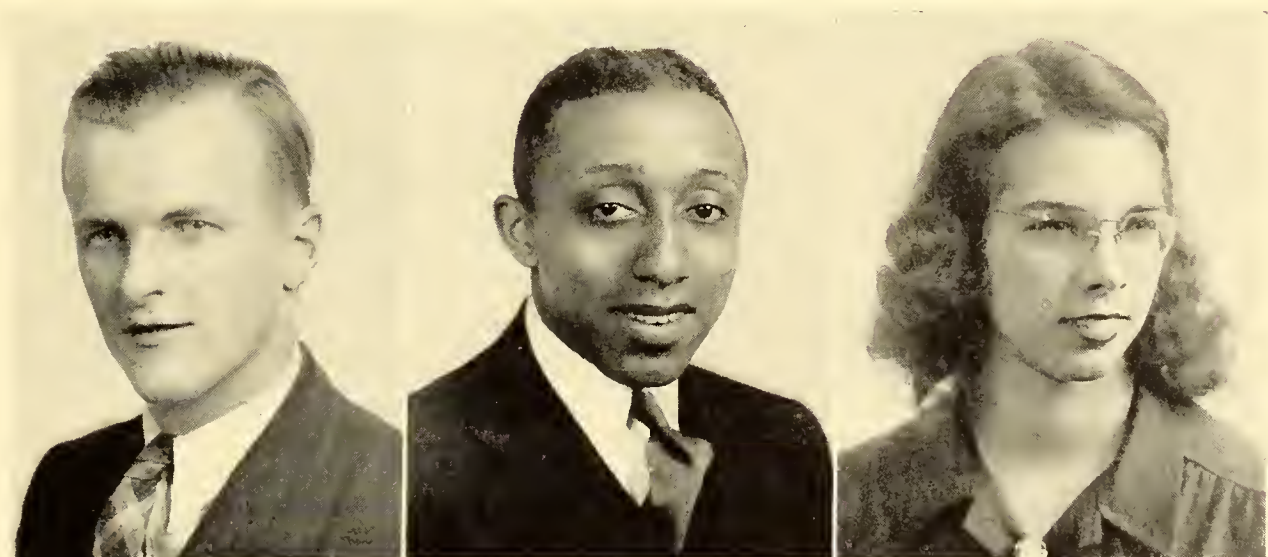

Ask any Mechanical student about the now famous  
story of "I'll see you in Paris." Al will never live  
this one down.

## BARBARA HATHAWAY

Special

*"The female of the species."*

Barbara is well-liked among the male students and  
can always be found in a cheerful mood. Every boy  
in school would go out of his way to help her.

### RALPH E. HAWES

Chemistry

Delta Kappa Phi

*"Something between a hindrance and a help."*

Ralphie is quite an enigma. We are still wondering where a certain young lady stands in his affection.

Activities: Golf 1, 2, 3; Basketball 2, 3. Editor in Chief Fabricator. Scribe D. K.

### GORDON HEALY

Mechanical

Phi Psi

*"Away he speeds on lonely paths."*

When typing correspondence for the baseball team, Gordon beat all records for speed typing—one word a minute.

Activities: Baseball Asst. Mgr. 1, Mgr. 2.

### NORMAN HILDITCH

General

Phi Psi

*"The easiest person to deceive is one's self."*

President Hilditch, a busy man, a good student, and above all a star athlete; ask him some time.

Activities: Soccer 1, 2, 3; Baseball 1, 2, 3; Basketball 1, 2, 3. Class President 3. Vice-President Phi Psi.

## BERNARD P. KUWASKI

Chemistry

Delta Kappa Phi

*"Water, water everywhere."*

Bernie must be the Pied Piper, judging from the way the "rats" pop up in his vicinity.

Activities: Basketball 1, 2, 3; Tennis 1, 2, 3. Asst. Humor Editor Fabricator.

## ARNOLD LARSEN

Mechanical

*"His strength is the strength of ten."*

"Little Abner" eats 25 eggs for breakfast and beats the trolley in from Lincoln Park on his bicycle every morning.

## JAMES LEONTIRE

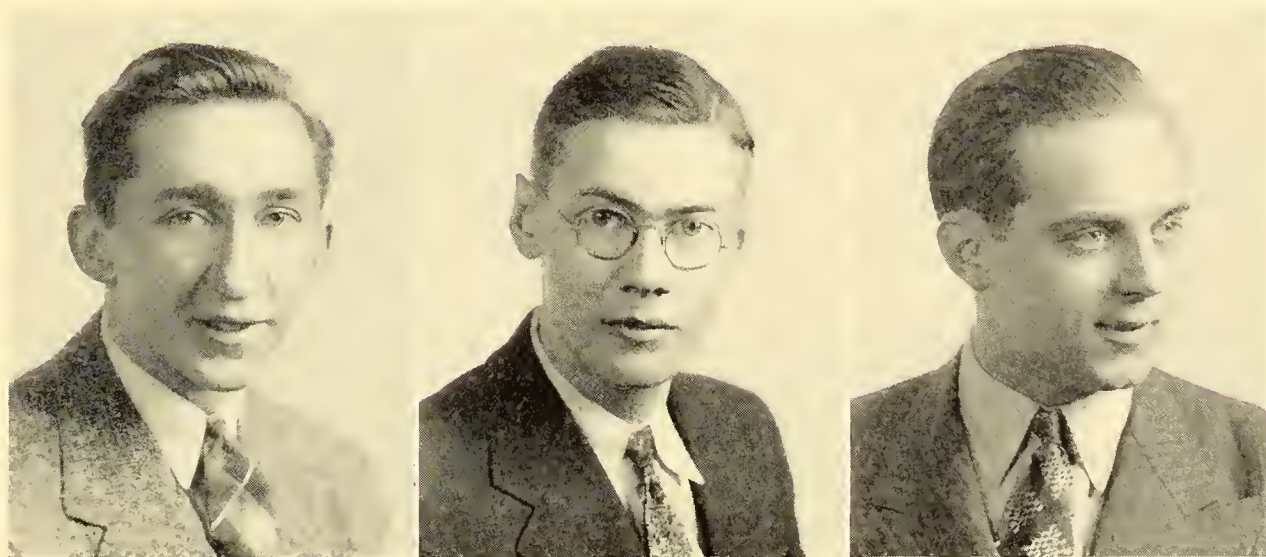

Chemistry

Delta Kappa Phi

*"Blessed be the peacemakers."*

Jim has quelled a few riots in our gym and should get a *croix de guerre* before leaving. He is also a peanut eating champion.

Activities: Prom Committee. Serg.-at-Arms, D. K.

### ROBERT R. LONG

Chemistry

Delta Kappa Phi

*"Neither a borrower nor a lender be."*

Positively the most unprepared boy in school. Never has a pen, pencil, paper, notes, books, and most of all, cigarettes. Most annoying.

Activities: Soccer 1, 2, 3; Golf 3. Prom Committee. Custodian and Consul D. K.

### MOSES MACIA

General

Phi Psi

*"Oh that I were a boy again."*

Though the oldest member of the class, Moe is one of the most active and always seems to have something up his sleeve.

Activities: President Phi Psi.

### HENRY MAGELLAN

Mechanical

Delta Kappa Phi

*"Be sure your tailor is a man of sense."*

If his father cuts any more hair off the head of our Number One jitterbug, Henry will have a hole in it.

Activities: Basketball 1, 2; Baseball 1.

## STEVEN MEMBLATT

General

Sigma Phi Tau

*"Nothing succeeds like success."*

Steve is one of the hardest workers and most conscientious students in the class. He'll never leave a job until it is done well.

Activities: Vice Councillor Sigma Phi Tau.

## WINIFRED PARDEY

Special

*"Cold as a cucumber."*

Our hats are off to Winnie, who completed three years' work in two years' time. Get up off the radiator, Winifred, and take a bow.

## EARL V. PATNAUDE

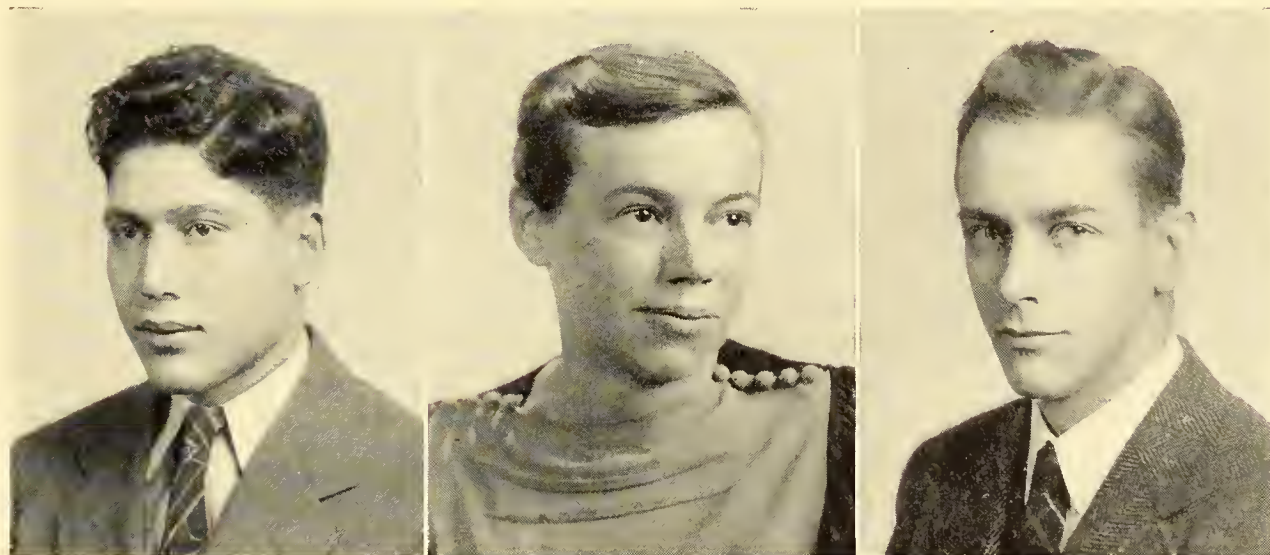

Chemistry

Delta Kappa Phi

*"I dreamed a dream that could not be."*

For a diversion from his school work, Pat goes home and has nightmares. Certain fellow classmates have made Earl's life in school a nightmare, too.

Activities: Class President 1; Vice-President 1, 2, 3. Annotator D. K.

### PERCY RAWCLIFF

Mechanical

*"A gentleman and a scholar."*

Rocky is a studious fellow and can generally be seen lugging a briefcase from one place to another.

### WINSTON SAGAR

General

Phi Psi

*"To be awake is to be alive."*

Win has a quick temper but a heart of gold. Regardless of what he does he runs across more trouble than any other two students, but he'll figure it out.

Activities: Golf 1, 2, 3; Soccer 1, 2, 3.

### RAYMOND ST. PIERRE

Mechanical

*"His form was ponderous and his step was slow."*

Mr. Crompton is seriously thinking of installing steel chairs for future students like Ray.

Activities: Baseball 1, 2; Basketball 2. Business Mgr. Fabricator.

## ISAAC STEINER

General

Sigma Phi Tau

*"Facts and figures, put 'em down."*

Number One scholar of the general class. He'll come out on top in everything he tries.

Activities: Councillor Sigma Phi Tau.

## G. ROBERT STETSON

Chemistry

Delta Kappa Phi

*"A fellow of infinite jest, of most excellent fancy."*

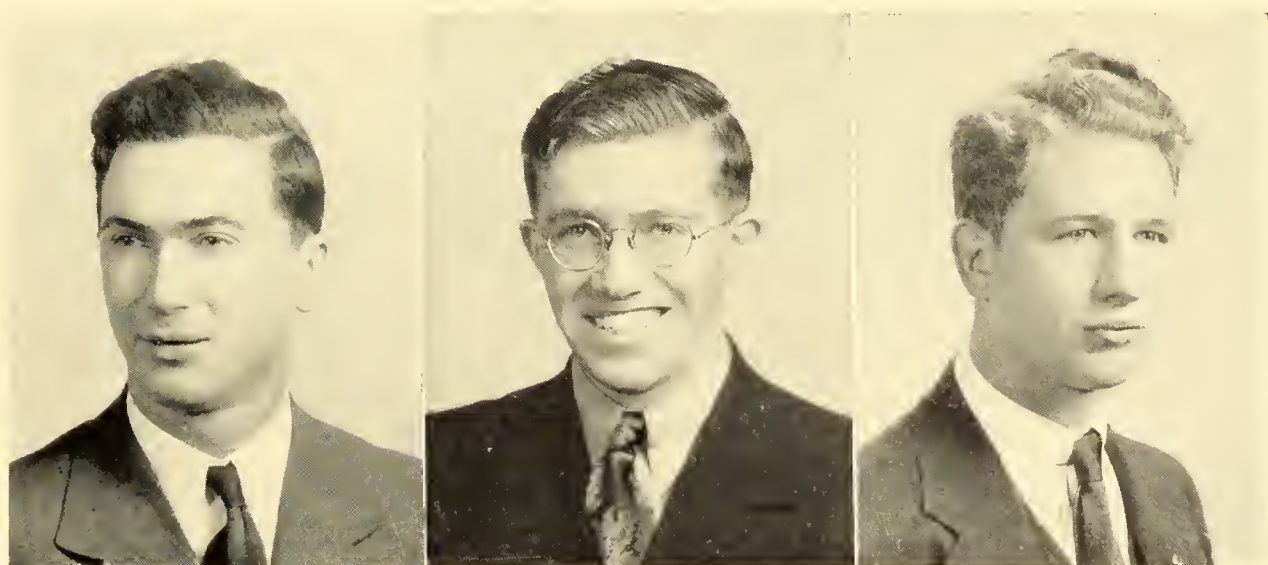

Tech's own John Kieran. What Stet doesn't know isn't worth knowing, unless it's the answers to the questions in the finals.

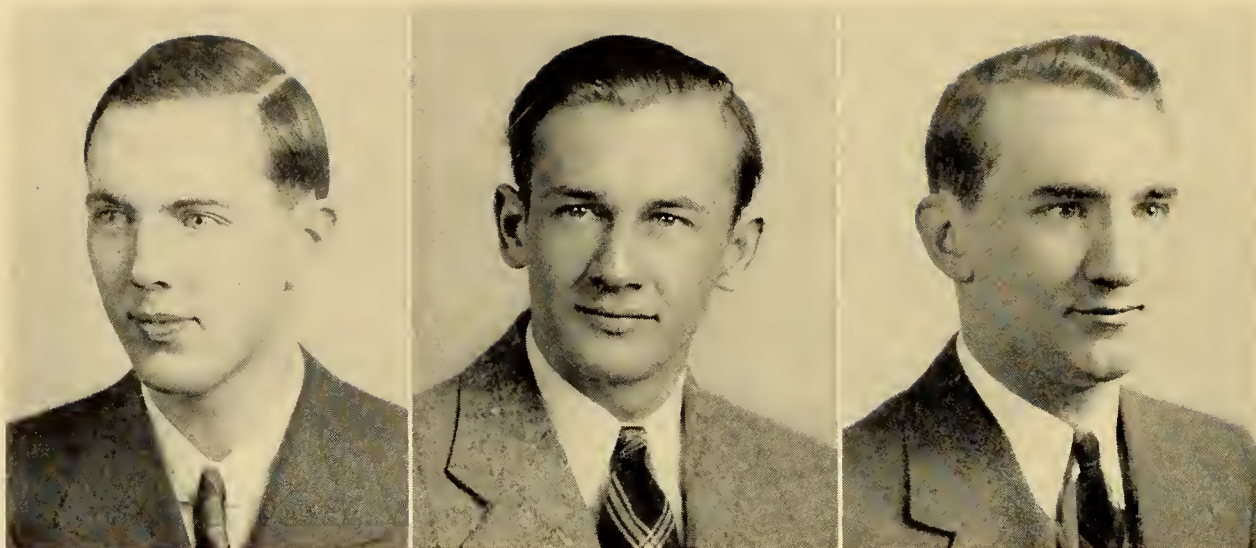

## ALFRED STIEGLER

Mechanical

*"Silent performance maketh best return."*

We waited and waited, but Al was never caught without the answer to Mr. Crompton's simple steam questions.

### RAYMOND W. SUMNER

Chemistry

Delta Kappa Phi

*"His only fault is that he has no faults."*

Ray, the mental wizard of the class, is also master of innuendo. His remarks are too subtle for such fellows as Patnaude to catch on to. Also noted for his bad jokes is this third Musketeer.

Activities: Baseball 1; Soccer 2; Tennis 2, 3. Treasurer Class 2, 3. Treasurer D. K. 3. Asst. Mgr. Basketball 2, Mgr. 3.

### ALDEN F. TAYLOR

Chemistry

Phi Psi

*"A grain of manhood."*

Baby-faced Alden may have many friends, but his relationship with the first-year boys isn't strictly kosher.

Activities: Soccer 2, 3.

### HERMES TOUCHETTE

General

Phi Psi

*"A picture no artist can paint."*

Hermes is a good-hearted soul and is willing to do anything at any time. He can generally be found drawing cartoons of Hilditch.

Activities: Asst. Mgr. Soccer 2, Mgr. 3. Art Editor Fabricator.

## ROBERT WHEWELL

General

*"I love fools' experiments."*

Bob, who is a top-notch designer, is in the navy now. If his ability as a sailor parallels his designing ability, he'll be an admiral before you know it. Good luck, Bob.

Activities: Soccer 1, 2, 3; Tennis 2; Golf 3.

## JAMES WILSON

Mechanical

*"I cried for madder music."*

If you want to put up a little wager, see Jim. He's always willing to match you for a thin one. Jim is also a rug-cutter of no mean ability.

Activities: Basketball 1, 2; Baseball 2.

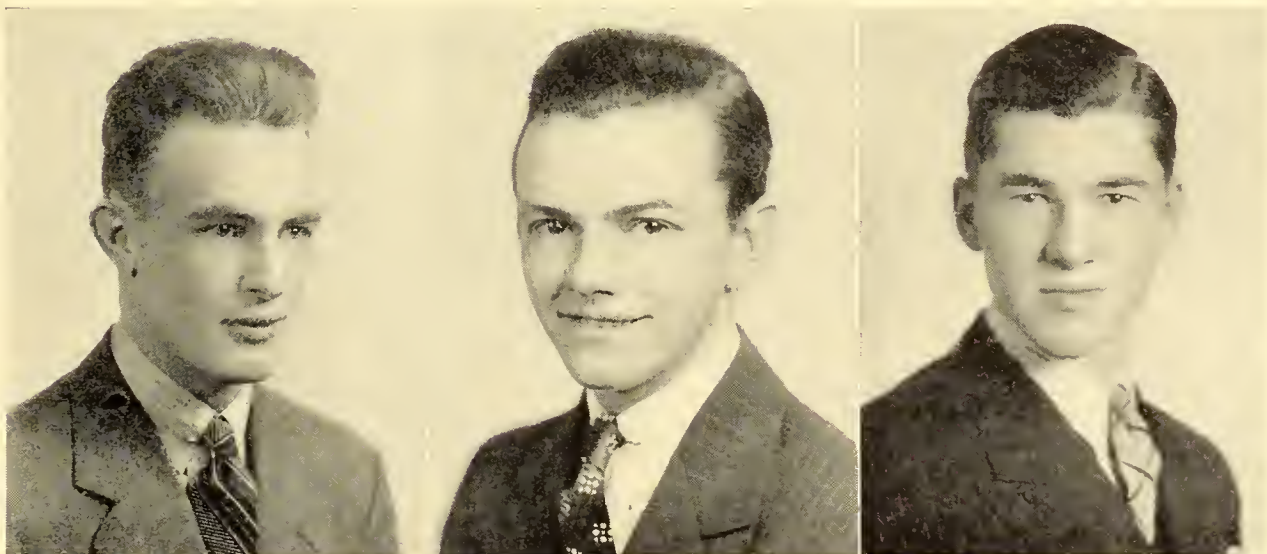

## WILLIAM H. WINGATE, JR.

Chemistry

*"To do two things at once is to do neither."*

Big Bill is our most distinguished looking student, and his unassuming manner has surrounded him with many friends.

Activities: Soccer 2; Golf 3.

LaRue	Duckworth	Perperas	Dahl	Coyne	Hayman
Donovan	Wood	Ortiz	B. Cosio	Tripp	A. Cosio

VENTURA and ANGEL COSIO — Better known as “Benny and Sonny.” Benny is a quiet fellow, while his brother tends to be a little more active. Since coming from Mexico, their English has improved immensely. You should hear some of the cute sayings they come out with.

COYNE—John is one of the best-liked members of our class. He’s smart as a whip and quite a soccer and baseball player. He is also known for his popularity amongst the girls in the school.

DONOVAN—“Danny” has many interesting nicknames which fit him well. The most common and best fitting of these is “Lover.” Danny is a fast basketball player and is liked by all the students.

DUCKWORTH — “Norm” attends classes more regularly this year. Could it be that he comes so that he may gaze more frequently on one of our coed’s charms?

HAYMAN—Better known as “Chris”, We are all wondering why he goes

around singing “I Can’t Get Indiana Off My Mind.” Could the boys put him in a tough spot. “Chris” really is a fine fellow.

LaRUE—“Jack” is growing up to be quite a boy. He is on the basketball squad and is developing into a good player. Why don’t you come to school more often, Paul? We like to see you around.

ORTIZ—Known as “Just plain Eddie.” He has found this year to be most interesting. You see, we have more young ladies enrolled this year than usual. He is an easy fellow to get along with, and can tell some very interesting stories.

PERPERAS — Greece has many friends or should I say relatives at N.B.T.S. and one of the best is “Charlie.” He plays a fast game of basketball also.

WOOD—Warren has become greatly attached to the Mexicans as they are always seen together. “Woodie” is also seen with a certain miss. I wonder who she is?

# CHEMISTRY

# CLASS OF 1942

CACELLA — Arthur couldn't be called tall, but he is dark and handsome. He's rather quiet and studious but he has a wit that pops up when least expected.

GREGORY — Warren has what it takes to be a success but he'll prove it himself in New York this summer.

HILTON — Johnny can get into more mixups than any ten people put together. What he needs is someone to look after him. All fooling aside he knows his stuff when it comes to chemistry.

HUGHES — "A friend in need is a friend indeed." This saying fits Johnny in more ways than one.

LEHMAN — Among his many accomplishments are basketball and dyeing. We are willing to bet he'll go far in the industries.

MARCELLINO — Bill is rather an unassuming chap but it is said that "still water runs deep."

MOGILNICKI — Gene has everything and that's an understatement. He'd go out for every sport in school if he had time. In spite of athletics he is never afraid to show his report card to anyone.

MEUNIER — A commuter from Taunton. Rain, snow, sleet, etc. have little effect on Ed. What (or should we say who) detains you at times?

MONIZ — This chap doesn't say much but that doesn't mean he doesn't get

around. His lessons are above par even tho' lectures go by without a note taken.

OHM — Herky is tall, blond, good looking and a disposition that will be an asset in whatever he attempts.

OWEN — Charlie has become somewhat quiet since last year. Even now Charlie has that "gleam in his eye."

PEARSON — Sometimes we wonder why Donald comes to school. Seems he'd be a better broker or M. C.

PHANEUF — The sound of breaking glass will usually tell when Jean is around. Would we be amiss if we called him "Little Corporal"?

REMILLARD — Not a bad guy when you get to know him. And girls, you have to admit he is handsome. Too bad Emil was absent when the picture was taken, he might have given someone a thrill.

SCOTT — Scotty has that military air about him. The world would never suffer with more men like him.

SENESAC — "Devil may care" is the only way to express him. He does his work but not even he can vouch for the results.

WOBECKY — Buddy, as his friends call him, has proven himself a tennis player. We know he is an excellent student and now we are wondering what else he can do.

Poitras Owen Scott Meunier Phaneuf Marcellino  
Hughes Wobecky Moniz Senesac Lehman Cacella  
Ohm Mogilnicki Hilton Pearson Gregory

Counsell	Mulvey	Whelpley	Allain	Letendre	Cote	Tanquay
Cartmell	Walder	Tinkham	Irvin	Andrews	Mellor	

ANDREWS—Ray is one of those fun-loving boys who can match wits with the best of them.

ALLAIN — Mr. Gourley's hope for next year's baseball team, Jerry is also a good worker in school.

COTE—Here is a quiet lad; we wonder what he thinks about.

COUNSELL—Well-liked among his class-mates, Alden hopes to be a draftsman.

CURRY—Always playing tricks; occasionally he manages to get a little work done.

IRVIN—"Little Oiwin" is another mechanical marvel who manages to look busy at the right time.

LETENDRE—This lad is quite a hunter as well as a machinist.

MELLOR — Don's carefree manner produced unexpected results during the basketball season.

MULVEY—Tom would be an athlete if he could. May be what the soccer team needs—for a water boy.

TANQUAY—This boy is so busy at his work that he scarcely finds time to meet his classmates.

TINKHAM—"Tink" is easy to get along with and is a great help around the shop.

WALDER — Bernard's eccentricities make him an interesting companion in any field.

WHELPLEY — Johnny is tops in studies and has a great many friends in school.

Never before in the history of New Bedford Textile School have there been so many coeds. The following data may somewhat enlighten the reader as to their respective natures.

**BEVERLY THERRIEN**—Even in a class of girls there is someone with a ready wit and sense of humor. Or to quote Shakespeare, "Beverly is the soul of wit."

**EILEEN CARROLL**—We haven't made up our minds whether Eileen came to Textile because of her interest in fabrics or a certain soccer player.

**LILLIAN MAYE**—"Lil," secretary of her class, is a very popular young lady among both boys and girls.

**LUCY ELDREDGE**—"Sunny" hails from across the river. She has red hair, but we can't see that her temper is in any way affected by it.

**ELLEN BESSE**—Another Fairhavenite and the class athlete as well. Ellen goes in for sports in a big way and usually comes out on top.

**WANDA SIECZKOWSKA**--Wanda says little, and would hardly be noticed at all except for her very pleasant appearance.

**BARBARA MANCHESTER**—Barbara is the Big City gal. She's from "plain old Brooklyn." A grand disposition makes her a favorite with all, including a certain senior chemist.

**ANNE ATCHISON**—Anne is rather quiet but she doesn't miss much. She is good fun and is well-liked by her classmates.

**FAITH BROADMEADOW**—Petite is the word to describe Faith, although she probably has a better name for it. Snappy on repartee, Faith can pin anyone's ears back with her remarks.

**ROSALYN GOLDSTEIN**--We have heard that "Dolly" is an actress. She is an able scholar as well, as her marks indicate.

**EUDORA CARVALHO**—The sophisticated member of the class. Poise and charms are to be learned from "Dora", if the other girls only had the patience.

**MARIE HEALY** — Another miss who comes under the heading of "popular." Her easy going disposition and ready smile are responsible for this. Marie is treasurer of her class.

Carroll    Carvalho    Therrien    Siczowska    Goldstein    Broadmeadow  
Besse    Atchison    Healy    Maye    Eldredge    Manchester

Lemire  
Mendell

Mendoza  
Pérez

Carter  
Wood

Kessell  
Odiorne

MENDOZA — Henry is popularly known as the “mad chemist” among his classmates. He hails from Dighton which we have been trying to find on the map for years.

ODIORNE—This long and lanky fellow hails from across the river. If he is a sample of what to expect from his town, not bad.

O’LEARY—Hails from Newton, but he’s becoming acquainted with New Bedford or is it vice versa?

PEREZ—The “Casanova” from Latin America. He claims to be a woman-hater but he keeps contradicting himself.

WOOD—Here is a tall likeable chap who has become quite a basketball enthusiast since entering N.B.T.S.

CARTER—What a man! Works all night and then comes to school the next day fresh as a cucumber, and receives the highest grades in his class. We wonder if his wife ever sees him.

KESSEL—Would someone please put this boy in the “know” about these New Bedford gals.

LEMIRE — Nose to the grindstone during school hours, but he believes that all work and no play makes “Ronny” a dull boy.

MENDELL — Carlton’s classmates have begun to believe that it is impossible for him to get to school at 8:30 A. M.

# CHEMISTRY

# CLASS OF 1943

Any resemblance of this class to any other, past, present, or future, is purely coincidental, and has no reference to any persons living or dead.

In future years you will find that we so called "lame brains" of today will be the accomplished industrialists of tomorrow.

BEAN—Silent and sly, but full of eruptions—and we don't mean acne.

CHASE—Between the milk route and mobsterism he has little time for scientific metriculation.

CORRIGAN—The finery that elected him class president is undermined—his Packard—his girl—and greater things.

DUTRA—The joker of the pack (a card), always getting shuffled around.

ENTWISTLE—Procrastination and two women constitute Bill's daily grind.

FUSCO—His rustic sense of humor and a fixation that "Crime Does Not Pay" will insure his success as a Plumber.

HATHAWAY—The friend of all—always a spare minute—and see's Entwistle for locker space.

HOUGHTON—"A diller a dollar, a ten o'clock scholar"—or as a famous educator says, "Car trouble."

LAYCOCK—Joseph John is a strong backer for his success as a chemist. Attention C. P. and all Honor System followers.

MATHER—A true consulting chemist and thus voluntarily in charge of "Advice to the Love Lorn."

MANCHESTER—"Pretty Boy" gets along very well—we wonder if mobsterism has anything to do with his studies.

MEE—Happiest when sitting in Browne's listening to the strains of McNamara's Band. How about homework, Bill?

MALICK, DONALD—An ungodly laugh does not herald the entrance of Frankenstein, but of Mr. Hyde.

MALICK, J.—The Dr. Jekyll of the Mallick combination. You're all right, Jake.

NICHOLSON—Every class has its problem child. Ah, sweet mystery of life.

PINAULT—At last we have found the kind of Ruffy (I'll Moider de Bum) Balonki.—Consult J. Palooka.

SEDERHOLM—We wonder if "Legs" will ever catch up to that other nickname of "See-Da-Point".

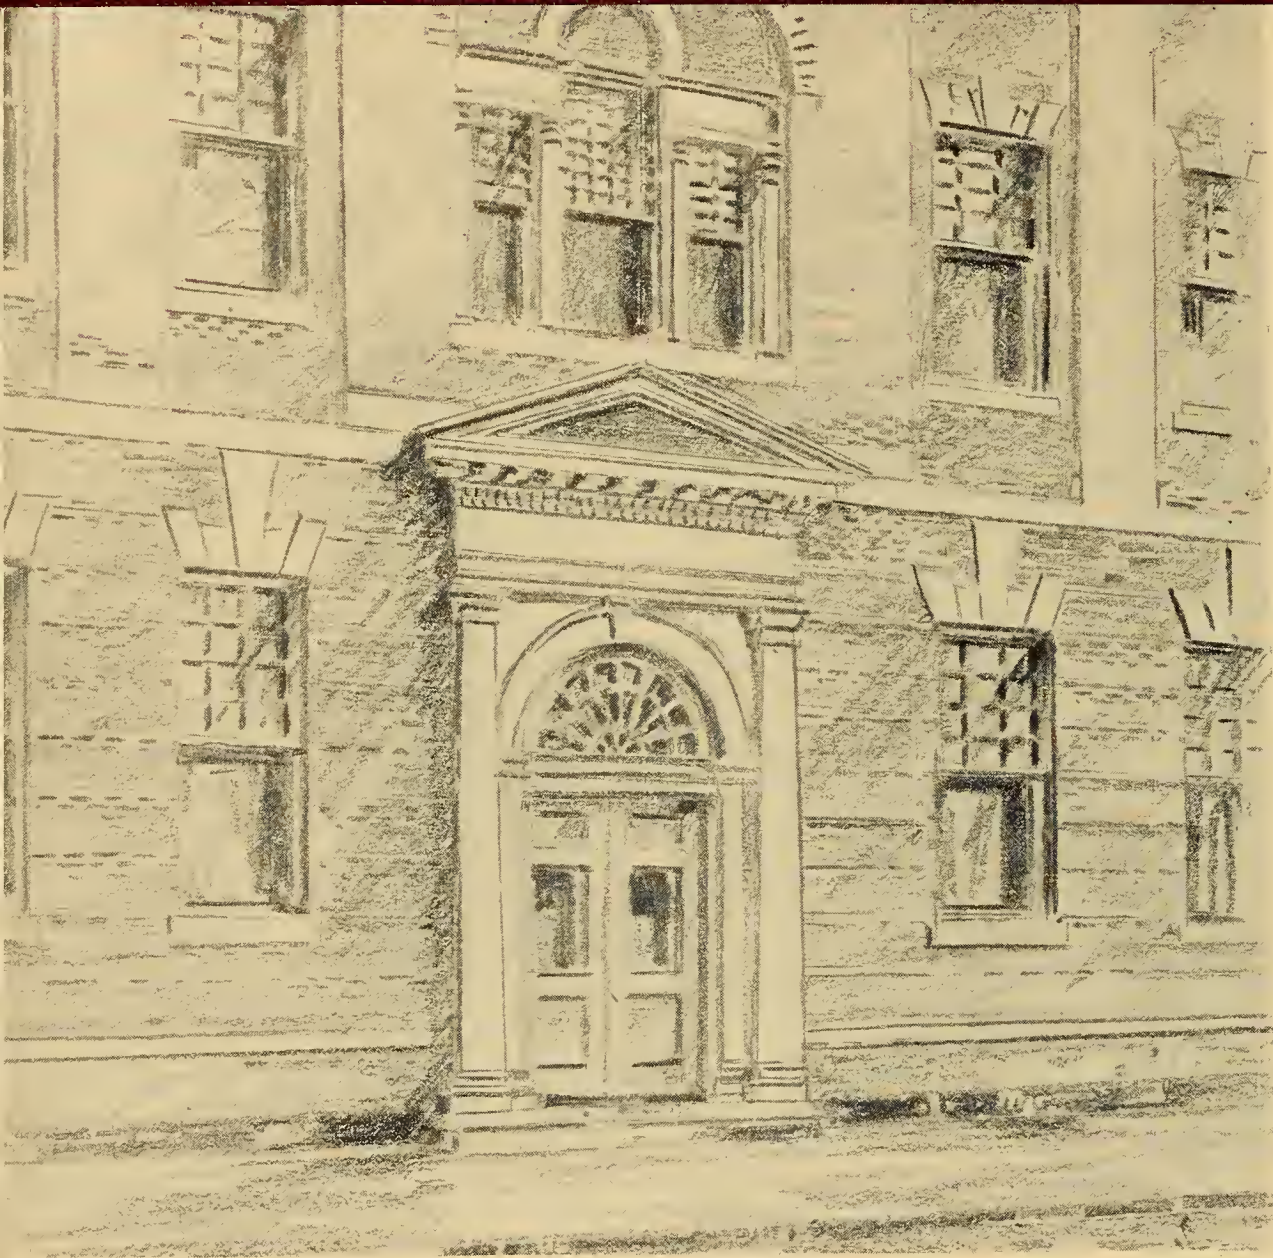

WALDER—The ardent accomplice of the "Jekyll and Hyde" duet.

WHALLEY—"Do you like me for myself alone, or for my fine clothes."

Whalley Dutra Fusco Mee Nicholson Entwistle

EXTRA CURRICULAR

## HISTORY OF THE

THE second Monday in September, 1938. Not an unusual day to most people, but to those entering Textile School it was eagerly awaited and nervously attended. On this particular day, many fine young men and a solitary young lady entered the portals of this school, looking forward to being graduated three years hence, although that day of graduation seemed eons away. Now that it is here, however, the past three years appear infinitesimal. Let us look back on these years and reminisce:

In October, 1938, the first class officers were chosen: Edward Wood, Earl Patnaude, Wilbur Delano, and Barbara Hathaway were president, vice-president, secretary, and treasurer, respectively. During this month several of the students accepted invitations to join fraternities and endured the subsequent hazing ordeal like men. One or two of our classmates found positions in other fields and were removed from the annals of our class. The obstacles of mid-year exams were surmounted, and preparations for the second term began. This term flew quickly by, and finals were disposed of.

Our second year began without much fear and trepidation. New officers were chosen: Andy Goodwin, Earl Patnaude, Barbara Hathaway, and Ray Sumner were named president, vice-president, secretary, and treasurer, respectively. Fraternities selected more of our members, and Miss Hathaway became a mere 50% of our feminine contingent when Winifred Pardey enrolled with the class. Extracurricular activities were indulged in by the more athletic members of the class. Midyears . . . Finals . . . Vacation.

September 1940. The first two years sped by so fast that it did not seem possible that all the work to be done could be finished in one short year. The election of class officers was probably looked into more carefully than in previous years to insure good leadership. Norm Hilditch was elected president; Earl Patnaude served his third consecutive year as vice-president; Ray Sumner was re-elected treasurer: Fran Frey was named secretary. Ralph Hawes was named Editor-in-Chief of the *Fabricator*, in which capacity he has served well, being ably assisted by a hard-working staff.

In October of this year, Mr. Edward Murphy left the faculty, the vacancy which resulted being adequately filled by Mr. Richard Barry.

## CLASS OF 1941

Once again tempus fugited and midyears were upon us before we realized it. Then preparations for graduation began. Committees for rings, prom and banquet, and so forth, were named; the *Fabricator* was edited, class pictures were taken and individual pictures were exchanged, and the eventful day of June 6th was coming nearer and nearer.

The seniors played their final games for Textile in the field of athletics. Those missed from the basketball squad next year will be Hawes, Kuwaski, Goodwin, Hilditch, Dabrowski, Barter, and Mgr. Sumner. Soccer will have to find men to replace such stalwarts as Captain Bob Whewell, Hilditch, and Sagar. The baseball team will be faced with the loss of Goodwin, Ferdinand, Frey, Hilditch, and others, while tennis and golf lose key men.

In April of this final year, Mr. Fred Busby, head of the chemistry department, retired, and his successor Mr. Francis Tripp will have a difficult time filling the shoes of a man who had the respect and admiration of the entire student body.

The Delta Kappa Phi Fraternity National Convention was held in New Bedford this year, and a dance was given at the school in honor of the Kappa boys from Philadelphia and Lowell. New friends were made, and the visitors went home feeling that the trip up here had not been in vain.

The crowning social event of the three years was of course the prom and banquet, which was held at Charlie's Diner in East Providence. Here was an event long to be remembered when other memories have been forgotten.

Graduation, at long last. Caps and gowns lent dignity to the climax of our three years of toil and fun. As we received our diplomas various thoughts ran through our minds—of time wasted, of jobs we hoped to get, and of the work we wish to accomplish on this sphere of life.

As we stood for the last time as a group, bidding a last goodbye to many who have been good friends and to the school whose teachers have been friends as well as instructors, it was difficult to realize that these three years of pleasure and instruction had come to an end, three years in which we have come to learn that "Nothing is worth doing unless it is done well."

# *New Bedford Textile School Alumni Association*

## ASSOCIATION OFFICERS

President	- - - - -	Eliot Borden
Vice-President	- - - - -	James L. Giblin
Secretary	- - - - -	Scott Whitcher
Treasurer	- - - - -	Edward L. Murphy, Jr.

To every member of the class of 1941, the Alumni Association extends its very best wishes for good health, happiness and success during the all-important years of life which are about to begin.

The present sorrowful, uncertain conditions throughout the world have necessitated a wide increase in industrial production. Our textile business is now in need of many men with technical training such as you graduates of 1941 have upon leaving school. Find your proper place as soon as possible, use your education in every possible way, and do your best at all times to uplift yourself and your school. Those of you who will be called into military training, accept your temporary detour in the light of educational experience. Each of you who are called will have an ideal opportunity to benefit your life by learning self-dependence and by building self-character.

The Alumni Association is at the present time in a very healthy condition. In the past few years there has been continual, progressive advancement. Many notable accomplishments have been worked out. Many more are in the stage of development. The Association officers are ever willing to lead in Alumni affairs, but require each member's co-operation and assistance in any manner in which they are called upon to do their share.

A sincere loss to the Association occurred early in the school year through the resignation from the faculty of Edward L. Murphy, Jr. We know "Red" hated to leave us as much as we hated to see him go from the school. He was an anxious and willing leader. His resignation from the teaching staff took him away from the "home office" but he has continued his good work and sincere interest in the Alumni Association. Mr. Murphy has definitely set up plans for creating an Alumni Chapter in Boston. There are many graduates of New Bedford Textile School in the area of Greater Boston. Undoubtedly they would become more active in Alumni activities with their own local Chapter operating. We look for Mr. Murphy to develop something good. Any graduate of the class of 1941 locating in or around Boston will find it beneficial to contact Edward L. Murphy, Jr. at the office of Brown-Durrell Co., Essex and Kingston Streets, Boston, Mass.

Other plans for broadening Alumni activity include the possibility of the formation of a Chapter at Philadelphia. Several members from that district have signified a desire to form an Alumni group. It is well worth the effort extended by all concerned to have an Active Chapter. The boys in Philadelphia will find dividends will result from their investment of interest in the Association.

An affair during the past year, although one of a regretful nature because of its purpose, brought to-gether many members of the Association. This affair was the tendering of a testimonial dinner to Mr. Fred E. Busby, in recognition of his many years of devotion and sincere service to the school, at the time of his retirement from the position as Head of the Chemistry, Dyeing, and Finishing Department. Appropriate remarks for the occasion were officially expressed by our president, Eliot Borden. The Alumni members present, in addition to having the pleasure of assisting in the honor paid to Mr. Busby, found the occasion opportune for re-union with many school friends.

The New York Alumni Chapter continues its activity. This Chapter has for many years held monthly dinner meetings at which a large number of members gather each month. Just recently, the New York group announced the establishment of the Everett H. Hinckley Memorial Scholarship to be given yearly to a student at the school. This award by the New York Chapter marks another step forward by the members of that Chapter in their desire to be of material benefit to the School. The scholarship is in honor of the late Mr. Hinckley in recognition of his interest in the development of the Dyeing and Finishing Department at the School.

The present officers of the New York Chapter are: President, Gordon Smith, Seneca Textiles, 91 Franklin St., New York City; Vice-President, James Hollis, Schener and Co., 72 Leonard St., New York City; Secretary, Stasia Strauhawski, Clarence S. Brown Co., New York City; Treasurer, James McLoughlin, Seneca Textiles, 91 Franklin St., New York City.

At the closing of this school year, the Alumni again will publish its newspaper. Each member of the graduating class will receive a copy of this publication. The Annual Meeting and Clambake will, as is the custom, take place the day following graduation. It is our earnest hope that every member of the class of 1941 will be present at this affair and officially become members of the Alumni Association.

## ACTIVITIES 1940-41

Delta Chapter started the season's activities by holding open house at East Wareham on October 15th. Of the twenty-two prospects gathered there, fourteen desired admittance to our Brotherhood. The pledges received the first degree during the initiation week held in early November. The event was successful from all viewpoints.

In November the annual football classic between the DK's and Phi Psi was staged. Phi Psi emerged the winner by a 13-0 score avenging last year's setback. The rivalry continued on the basketball court where the Delta Kappa's handed Phi Psi a 14-13 setback. The scoring punch was furnished by Johnny Hughes, while Ray Sumner excelled on the defense. The second encounter resembled a German Schrecklichkeit with Phi Psi on top by a 14-11 count.

Delta Chapter acted as host to the National Convention which was held in New Bedford April 25-26. The principal business was the selection of a Supreme Council, composed of members from the local Alumni Chapter. The school dance on the 25th and the stag banquet at the New Bedford Hotel on the 26th highlighted the entertainment of the convention. The affair left many fond memories and was, by far, the outstanding event of the year.

#### CHAPTER OFFICERS

President: Moses Macia	Secretary: Francis Frey
Vice-President: Norman Hilditch	Treasurer: E. Mogilnicki

#### ACTIVITIES 1940 - 41

During a conservative 1940-41 season there were twelve new members added to the active chapter. Following the usual hilarious initiation a ritualistic third degree followed by a banquet was held at the Miles Standish Hotel in Boston. The formal and highly social event was enjoyed by many active and alumni members from Beta chapter.

In football, Phi Psi emerged victorious over rival Delta Kappa Phi Fraternity. Later in the year, using the same spirit and tact, Phi Psi divided honors with its rival on the basketball court.

This year it was the chapter's privilege to extend honorary membership to two men: Richard O. Barry, member of the faculty, and Charles Noon, Director of Dyeing at Mt. Hope Finishing Company.

The annual Phi Psi Convention was arranged by the Providence Alumni chapter and held at the Biltmore Hotel in Providence, May 16 and 17. In the foyer of the hotel, the active chapters had a competitive exhibit of school accomplishments.

At the conclusion of the school semester a Farewell Banquet and dance was enjoyed by all.

*Colors:* Black and Gold

The first event of the fraternal year was a joint smoker of Beta and Gamma Chapters on October 18 at New Bedford Hotel. Samuel Walder, Burton Sederholm, and Bernard Walder of New Bedford Textile School and Paul Gollis of Durfee Textile School were accepted as members of Beta Chapter. The formal induction took place at the annual Banquet and Dance in the Blue Room of the New Bedford Hotel.

The annual convention took place in New York in April. This was the most colorful event of the year.

A trip to Boston, and a theatre party there, wound up the fraternal affairs for the year.

Beta will lose two men this year, but a larger and more active chapter is expected next year.

# SCOPE

HOBBY	AMBITION	FAVORITE SAYING
Browne's Pharmacy.....	A Jitterbug Imitator.....	That's a sharp suit.
Sleeping.....	To go home.....	Suits me.
Golf.....	To graduate.....	Hssst.
Dancing.....	To find unknown dye.....	Did you hear this one?
Mech. Drawing.....	To date Hedy Lamarr.....	What I mean to say is . . .
His car.....	To live in Fairhaven.....	Are we late?
Counting money.....	To make a rat.....	I'll let you know later.
Baseball.....	To play better baseball.....	What's the fourth answer?
Helping Ike.....	None.....	Buzz off.
Radio.....	To get married.....	Now listen here.
Passing circulars.....	To pave Larsen's walks.....	Get away.
Dodging work.....	To get a Textile boyfriend.....	Come out sometime.
Golf.....	To do a chem. experiment.....	Like that there.
Automobiles.....	To be popular.....	What? Eh? Oh yeah.
Cutting cards.....	To be first.....	I've been bagged.
Playing ball.....	To own a shirt.....	Me and him.
Hens.....	To own a car.....	What a chicken.
Mr. Fawcett.....	To own a hot dog stand.....	Wahn carpsa caffee, pliz.
Mabel.....	To own a car.....	Buzz off.
Christine.....	To skip the finals.....	Lovely dish.
Jitterbugging.....	To own a jazz band.....	You ain't kidding.
Picture frames.....	To be tough.....	The alarm clock stopped.
Warm rooms.....	To be warm.....	Shut that window.
Chemistry.....	To live in China.....	In our lab. . . .
Photography.....	To get a good job.....	Oh, sugar beets.
Raising muscles.....	To make a neon sign.....	For goodness sakes.
Cartooning.....	To take off weight.....	If I had my way.
Model Railroads.....	To play Worcester Tech.....	I don't believe it.
Homework.....	Perfection.....	Why?
Photography.....	To improve his lab.....	I'm yongry.
Telling bad jokes.....	To see all Durbin pictures.....	I see. (with inflections)
Himself.....	To win an argument.....	In the A & P . . .
Cartooning.....	To tell a good joke.....	What happened?
The navy.....	To run the S.L. frames.....	Take it easy.
Matching.....	To hit a 1000-1 shot.....	Match you for a dime.
Waterproofing.....	To be a pilot.....	Awright.

# HUMOR

## A MORNING IN THE SENIOR LAB

- 8:30 Roll call.  
8:31 Cairns, Goodwin, and Sumner get to work.  
8:32 Class congregates to discuss last night's radio programs.  
8:55 Counsell and Co. arrive with some excuse about a flat tire or dead battery.  
9:15 Most of class has settled down to work.  
9:20 Stetson and Goodwin take time out to eat.  
9:30 Shorty and Little Joe disappear. We see them headed for the cellar stairs; later when they come back one has lost 50c.  
9:45 Shorty shouts, "Pat, unlock my desk".  
10:00 Dabrowski is target for wet rags.  
10:01 Counsell was hit by mistake.  
10:02 The war is on.  
10:03 The floor and several students are soaking wet.  
10:04 Mr. Brooks enters and everyone empties his rat and tries to look innocent; no success.  
10:20 Mr. Brooks is called out of the room—wrestling matches ensue.  
10:25 Recess begins.  
10:35 Recess ends.  
10:45 Class reappears from recess and congregates in corner to talk.  
10:46 Mr. Brooks enters, class migrates to weighing room to talk.  
10:47 Mr. Brooks appears in weighing room. Class reenters the lab. to work?  
11:00 John Barter (JB) makes his first appearance in the small lab wanting to borrow a pencil from Nellie Armitage. Neither of them ever has one.  
11:15 Time out for choral singing led by our able bass, Bill Wingate.  
11:30 All desks are locked and the boys are in the back room with hats and coats on.  
11:35 All the boys are suddenly on their feet as Mr. Brooks comes in.  
11:57 Bell rings and Andy, the janitor, runs to stop from being trampled down by the outrush of students.

---

A green little freshman in a green little way  
Mixed some chemicals up for fun one day.  
The green little grasses now tenderly wave  
O'er the green little freshman's green little grave.

---

Mabel: "You remind me of the sea."

Shorty: "Why, because I'm restless, wild and romantic?"

Mabel: "No, because you make me sick."

---

Book Seller: "This book will do half the work for you."

Frey: "Fine, I'll take two of them."

During a party at Betty's home, Kuwaski switched the lights off and Hawes was heard to say, "Well, what do we do now?"

---

Don't worry if your job is small  
And your rewards are few;  
Remember that the mighty oak  
Was once a nut like you.

---

Mr. Brooks: "Mr. Stetson, who invented an explosive, was once a pupil of mine in this very room."

Freshman: "I suppose that spot on the ceiling is his explosive."

Mr. Brooks: "No, that is Stetson."

---

My! does this world change. Why I can remember when my baby daughter loved dolls all painted up, and my son was mad about soldiers. But now, my son chases around after the painted dolls and my daughter is mad about the soldiers.

---

Methinks that I shall never see a hazard rougher than a tree—  
A tree o'er which my ball must fly if on the green it is to lie.  
A tree which stands that green to guard,  
And makes the shot extremely hard;  
A tree whose leafy arms extend  
To kill the mashie shot I send;  
A tree that stands in silence there,  
While angry golfers rave and swear.  
Niblicks were made for fools like me,  
Who cannot ever miss a tree.

---

Mr. Murphy: "Will this suit hold its shape?"

Salesman: "Absolutely, that suit is made of pure virgin wool."

Mr. Murphy: "I don't care about the morals of the sheep. Will it hold its shape?"

---

Is it true that Mr. Brooks caught the senior chemistry class working one day?

---

St. Pierre: "Everytime I see that fellow he is smoking the stub of a cigar."

Ferdinand: "Oh, that's a little habit he has picked up here and there."

---

Sumner: "Waiter, give me some ginger ale."

Waiter: "Pale?"

Sumner: "No, a glass will be enough."

---

Hilditch: (Athlete?) "How high is my temperature, Doc?"

Doctor: "About 101."

Hilditch: "What's the world's record?"

Dabrowski: "I saved a car check today by running to school behind a trolley."  
Armitage: "Well, why didn't you save a quarter by running behind a taxi."

---

"Look, Mother, there is a wolf in our back yard."  
"Hush, child, that is a Textile student."

---

Prof. Busby: "Counsell, how many times have I told you to get to class on time?"

Counsell: "I don't remember, I thought you were keeping tabs."

---

"Your teeth are like the stars," he said,  
And pressed her hand so tight.  
He spoke the truth for like the stars  
Her teeth came out at night.

---

The laugh of the year was when Jimmy Cairns came into the small lab. and said, "I squirted the whole first year class with a rat." We found out later that he got one person with a drop of H<sub>2</sub>O from a rat which was two inches long.

---

The only time the third year chemistry class ever works is Tuesday afternoon from 1 to 2:30. Their economics is due at 2:35.

---

The boys get angry when Mr. Barry breaks up a crap game by taking the dice away.

---

In Electricity, the 1941 class broke records with their marks. We will not discuss whether they were high or low.

---

#### PEEKING THRU THE KEYHOLE FROM THE INSIDE

Where did Long get the name "Rosebud"?  
Where does Alden soil all those handkerchiefs?  
Did Steiner get his fifty cents back?  
Who caused the "fish" commotion?  
What is John Barter's approach to Mr. Walker's office?  
Where does Touchette get all his ideas?  
Why does St. Pierre insist on always rolling on his stomach?  
Would Patnaude like to teach the girls chemistry?  
Was it fair that Jimmy Cairns was caught, as it was his first time?  
Do the chemistry boys ever juggle?  
How would you like to see Armitage imitate himself?  
Why did Hilditch leave the party early?

# 1940 BASEBALL SEASON

Players: Catchers, Ferdinand and Mogilnicki; Pitchers, J. Senesac, Coyne, and Poitras; Infielders, Goodwin, Downey, Lehman, Perperas, and Setera; Outfielders, Hilditch, Tripp, Jasonek, and G. Senesac. Substitutes: Magellan, Tolley, Babbitt, St. Pierre, Counsell, Augusto, and Moniz. Manager, Delano; Asst. Mgr., Healy.

Schedule		They	We
Lowell	Away	15	4
Fore River Appren.	Away	36	11
Wentworth	Away	8	9
Vocational	Home	18	3
Lowell	Home	4	5
Becker	Away	3	0
Durfee Textile	Away	5	11
Fore River Appren.	Home	9	5
Durfee Textile	Home	3	2

Textile, after a wobbly start, gave a good account of itself on the diamond last year. The boys dropped a 15-4 decision to Lowell in the opener, chiefly due to the bad weather and the equally bad miscues of the infield. The boys took the count again in a slugfest at Quincy, the Fore River team getting plenty of batting practice to win, 36-11.

Tech had to come from behind to get its first win of the year, 9-8, at the expense of Wentworth Institute, with Jean Senesac hitting his stride and pitching a seven-hit ball game.

In their first home game, the locals dropped one to its city rivals in a comedy of errors, 18-3. Most of the scoring was done in the early innings at the expense of Johnny Coyne. Poitras, who relieved him, turned in a creditable performance for the rest of the distance.

Tech evened things with Lowell, nipping the Weavers in a close game, 5-4. Senesac, who pitched well, won his own contest in the late innings, knocking in the tying and winning runs.

Armand Poitras twirled well against Becker, but lost 3-0 as the boys failed to hit in back of him. Senesac followed with a win over Durfee Textile, 11-5, getting good hitting and fine support.

Fore River and Durfee Textile took the two remaining games from the locals on Tech's home grounds, 9-5 and 3-2 respectively. Both games were well played and the breaks decided the issue in each case.

## TENNIS — 1940

Players: Kuwaski, Captain and Manager; Frey, Whewell, Dabrowski, Wobecky, Sumner, Tripp, Donovan, Meunier.

Schedule		They	We
De La Salle Acad.	Away	7	2
Dean Academy	Home	0	5
Pawtucket High	Away	3	5
M. I. T. Freshmen	Home	5	4
Durfee High	Home	6	3
De La Salle Acad.	Home	6	3
Durfee High	Away	7	2

The competition was keen on the courts this past season. De La Salle fielded a well-balanced team in the opener and took the match in stride,

7-2. Kuwaski won his singles against Jack Allen, and then teamed up with Frey to win in doubles and account for Tech's two points. After whitewashing Dean in an abbreviated contest and winning handily from Pawtucket, Textile's racquet wielders might well have called it a day. They fought hard against a superior M.I.T. Freshman outfit, losing 5-4, but Durfee High beat them twice and De La Salle won again, leaving the boys from New Bedford with two wins and five losses. The entire team, with the exception of Tripp, returns to the fold next season, and should do better.

## GOLF — 1940

Players: Hawes, Barter, Ziemba, Coe, Riley, Sagar.

Schedule		They	We
New Bedford High School	Away	6	3
Becker College	Home	4½	4½
Lowell Textile Institute	Away	17½	9½
Becker College	Away	6	3
Vocational	Home	0	9
New Bedford High School	Home	5	4
Vocational	Away	2	7
Lowell Textile Institute	Home	5	4
Won 2. Lost 5. Tied 1.			

New Bedford Textile's golf team found the going tough, in spite of a veteran team. The Maroon and Gray dropped its opener to New Bedford High, 6-3, but managed to gain a tie with Becker College of Worcester in a well-played match. Tech lost a pair of decisions to Lowell Tech and Becker before earning its first win of the season, a whitewash against Vocational.

New Bedford High again took Textile's measure, 5-4, the outcome being undecided until the last hole of the match, but Voke failed to break Tech's fairway jinx and lost 7-2. The local Textile outfit bowed out with a hard-luck loss to the Weavers from Lowell Textile, 5-4.

Ralph Hawes did yeoman work for a losing cause all season, while on various occasions Barter and Ziemba came up with sterling performances. Hawes, Barter, and Sagar will be the bulwark of next season's golf team.

## 1940-41 BASKETBALL SEASON

Sumner            Lehman            Townsend            Vien            Donovan  
 Goodwin        Mogilnicki        Kuwaski            Hawes            Hilditch

Players: Kuwaski, Mogilnicki, Goodwin, Hilditch, Hawes, Downey, Lehman, Donovan, Tolley, Mellor, Magellan, Remillard, Townsend, Wilson, Viens. Mgr., Sumner; Asst. Mgr., Cacella.

Schedule		They	We
Bridgewater S. T.	Away	37	36
Lowell Tex. Insti.	Away	48	31
Hyannis State T.	Home	32	31
N. B. Vocational	Away	39	29
Newport Tor. Sta.	Home	31	42
Becker College	Away	69	35
Durfee Textile	Away	33	55
Morse Twist Drill	Home	11	49
Hyannis State T.	Away	48	34
St. Anselm Fresh'n	Home	56	34
Durfee Textile	Home	21	50
Providence Col. Fr.	Home	25	33
Bridgewater S. T.	Home	Won by forfeit	
N. B. Vocational	Home	28	34
Becker College	Home	37	30
Newport Tor. Sta.	Away	36	24

Won 7. Lost 10.

Under the tutelage of a new coach, one Charlie O'Keefe, Tech was slow in getting started this season. Once on the winning path, however, the boys proved a hard nut to crack, as several outstanding rivals will attest. Bridgewater had the scare of its life when the boys from New Bedford rallied from an apparently hopeless cause to take a lead late in the opener, only to lose it again to a gallant home guard. The final score read, 37-36.

After Captain Kuwaski left the game with a broken nose, Lowell found New Bedford easy picking to go on to win, 48-31. The score was 21-20 in favor of Lowell when Bernie retired from the game.

Howard Mills dropped in a layup shot with 20 seconds to play, and Hyannis won from Textile, 32-31. Vocational also had to come from behind to win, 39-29, in a game which found the losers ahead 14-1 at the quarter.

Tech's first win of the season was registered against Newport's Torpedo Apprentices, 42-31, with Kuwaski tossing in 18 points. The win streak was short-lived as Becker took the New Bedford team's measure, 69-35, its annual shellacking. Ed Flynn hit for 24 points.

Bernie Kuwaski put on an exhibition of shooting before a Fall River audience and Tech walked away with a 55-33 win over Durfee Tech. The New Bedford captain's 28 points were tops for the year in Textile's scoring department. In a practice tilt, Tech's Bad Boys drubbed a supposedly good City league team 49-11, but against Hyannis the following week, the boys were woefully weak, losing to a superior team, 48-34.

St. Anselm's Freshmen were the best of Textile's opponents this year. Hampered by a strange floor, they trailed 21-20 at the half, but ripped the strings with 24 points in the third frame, winning 56-34.

Gene Mogilnicki hit his stride with 18 points against Durfee Textile and the locals won 50-21. Tech also came through with a surprise win over an heretofore undefeated Providence College Frosh, 33-25, although the Friars had bad luck on their shots. Kuwaski and Mogilnicki scored 26 points between them.

They're still talking about the Textile-Bridgewater fracas, which wound up in a mild riot. After hostilities were settled, the Bridgewater coach refused to continue the game and New Bedford was declared the winner by forfeit. We're sorry to see games end this way, especially with such good sportsmen as the Bridgewater boys.

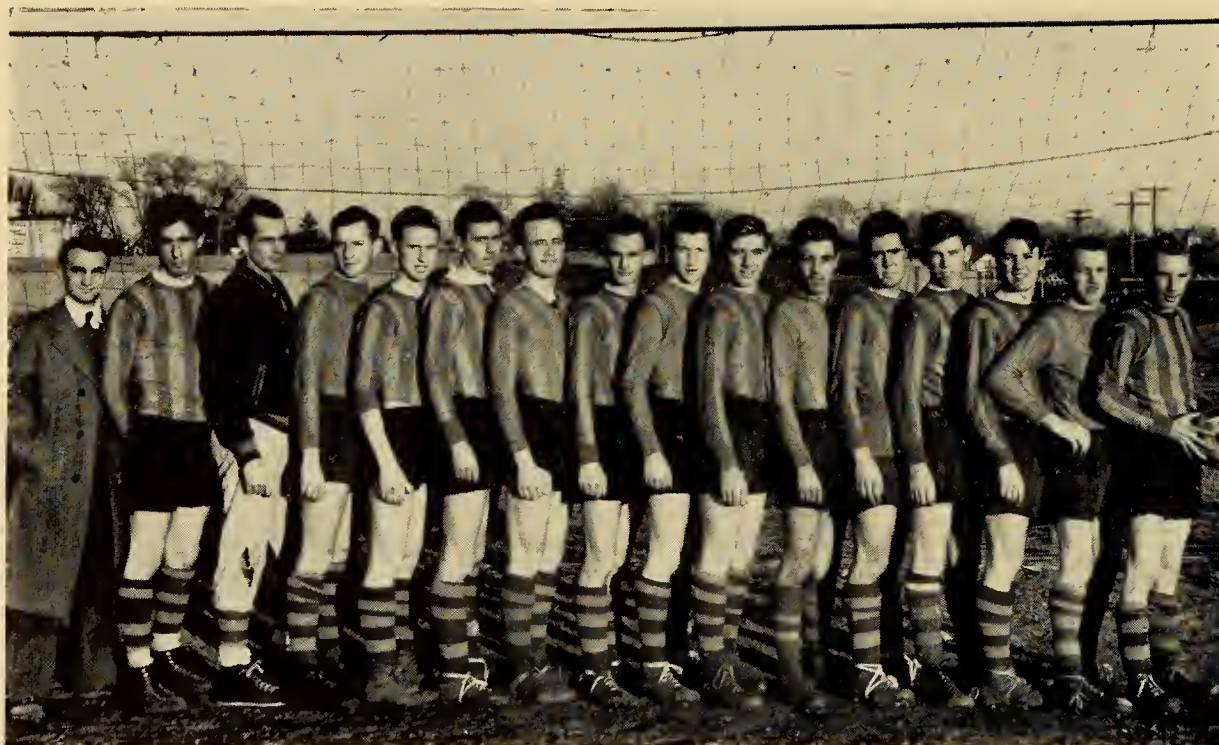

Tech evened its series with Voke with a 34-28 win. Mogilnicki and Kuwaski led the parade with 22 points between them.

Ed Flynn and Company were given a scare and Becker was fortunate to eke out a 37-30 win over the Maroon and Gray in the best played game of the season. Chief reason for the New Bedford showing was Andy Goodwin's guarding of Flynn, who only hit for three fields. Goodwin and Hilditch scored 14 points between them.

Tech drove to Newport and back in a blinding snowstorm, only to be handed a 36-24 setback at the hands of an under-rated Apprentice five. It was a poor ending for a season packed with hard fighting and spectacular playing. The opposition was tough and the competition keen, but the boys from New Bedford gave a good account of themselves and have every reason to be proud of their record.

Kuwaski had 149 points for a season total, while Mogilnicki was also over the century mark for his second year in a row with 121. These two forwards owe much of their success to the fine teamwork of Goodwin, Hilditch, Hawes, and the rest of a fine squad.

## 1940 SOCCER SEASON

Touchette  
Mendell  
Hilditch  
Macy  
Mogilnicki  
Frey  
Counsell  
Whewell  
Mellor  
Lehman  
Moniz  
Augusto  
Mulvey  
Coyne  
Sagar  
Ferdinand

Players: Goal, Hilditch; Fullbacks, Frey and Mendell; Halfbacks, Augusto, Whewell, and Ferdinand; Forwards, Coyne, Sagar, Mogilnicki, Moniz and Mulvey. Substitutes: Lehman, Mellor, Macy, Tolley, Long, Taylor, and Johnson.

Schedule		They	We
Vocational	Away	2	3
Bridgewater	Away	0	1
Brown J. V.	Away	1	2
Durfee Textile	Away	0	2
Vocational	Home	1	1
Durfee Textile	Home	1	1

Games Won: 4. Games Lost: 0.  
Games Tied: 2.

New Bedford Textile was undefeated in soccer this season for the first time in the history of the soccer team. Vocational was first victim, 3-2, with Sagar, Moniz, and Whewell scoring for the winners. Bob Whewell's educated toe gave Tech its second win at Bridgewater in a 1-0 shutout. Brown's J. V. outfit fell before the rush of Textile's forward wall, 2-1; Mogilnicki and Moniz led the charge, each getting one goal. Durfee Tech proved to be only a stepping stone to New Bedford's success, succumbing 2-0; Gene

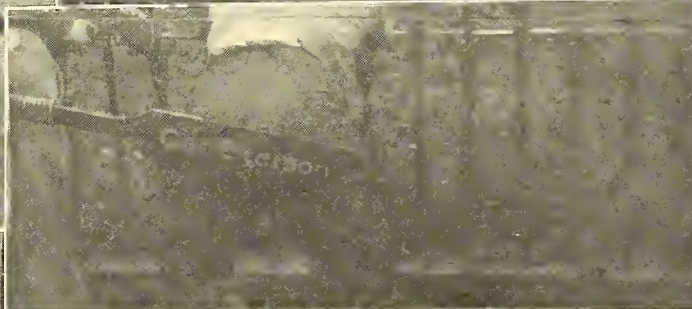

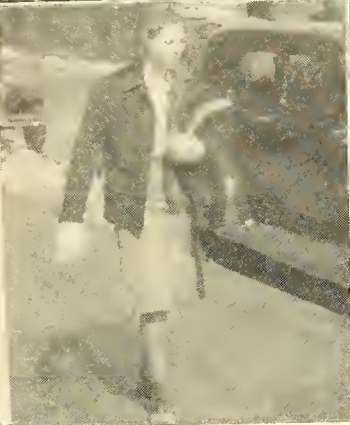

Mogilnicki registered both scores with Win Sagar and Don Mellor getting them up.

The weather man kept the boys idle for a week and the rest took its toll. The team could do no better than tie its last two tilts by identical 1-1 counts. Tech's tie with Voke, and its previous win over the same outfit, gave the lads the city title for the first time in six years.

Captain Whewell, Hilditch, Frey, Sagar, and Ferdinand played their last game for the soccer team, but Coach Fred Beardsworth has excellent prospects for another successful season.

The team was given a banquet at the end of the season, and the regulars were awarded chenille letters. At the banquet, Coach Beardsworth was presented with a leather wallet from the squad as a token of their appreciation for his time and talent which he so freely gave.

Fabricator staff — "Assume the angle" — Shylock — Fair coed — Kappa on parade — Making an impression — Tech welcomes Wilkie — Pappy — Leanin' on old top rail — Children at play — Rogues gallery.

Senior lab at recess — Mad chemists — "Where's our chauffeur?" — Rare pic of seniors working — Pretty-boy Taylor — "Watch the birdie" — All together, boys — Mo the machinist — A chemist at heart — Doc at work — Girls lend a hand — "Giddap!" — Bill — Sumner matching samples.

# THE MIRACLE OF MARCUS HOOK

**T**HIRTY YEARS AGO, on December 19, 1910, a group of engineers and scientists gathered in a new, unusual plant at Marcus Hook, Pa. This was to be the first commercial production of a man-made textile fiber in the U. S.

Finally, someone gave a signal. Machinery sprang to life. And from the equipment there began to issue slender filaments which were led through a chemical solution, then collected in the form of yarn.

A new American textile industry was born!

The progress of America's rayon industry in the thirty years that have passed since that first successful production in the Marcus Hook Plant of American Viscose Corporation is now history. Rayon has marched steadily ahead as it has made possible new, more beautiful and more durable fabrics. Today, it employs 49,000 American men and

women, and annually produces more than 300 million pounds of yarn. An outstanding example of American achievement.

From the first, American Viscose Corporation has figured prominently in every major development. It pioneered many vital advances for cost reduction, price reduction, and quality improvement. It established the Crown Quality Control Plan to assure consumers the quality they want in rayon merchandise. It instituted the "Textile Unit," a full-sized textile research plant, in order to better serve the industry.

American Viscose Corporation is proud of its 30-year record of achievement. And now, embarking on its fourth decade, it pledges continuance of the progressive policies which have stimulated the growth of the American rayon industry.

## *KEEP IN MIND*

# THE S & W RECORD OF PROGRESS

Through the introduction of new and better knitting methods . . . improvements in knitting devices . . . and the development of entirely new machines Scott & Williams has been contributing to progress in the knitting industry for more than three quarters of a century. Keep this long record of achievement in mind. The experience

gained by S & W over these years is a constant source of benefit to students and veterans alike throughout the knitting world. It is one of the reasons why S & W Knitting Machines and S & W service have attained such a high standing among mills that strive to give their customers the fullest value in knitting.

## REVERE TEXTILE PRINT ROLLS

### A New Bedford Product Famous for a Hundred Years

For more than a century the Taunton-New Bedford division of Revere Copper and Brass Incorporated has been making textile print rolls. As a result of this long experience the Revere organization is in a unique position to know and understand practical textile printing problems and how to meet them with rolls best adapted to give efficient, economical service.

Textile print roll requirements are severely exacting. The copper must be homogeneous, free from imperfections, impurities, hard spots, strata, blow holes. It must be evenly, precisely tempered, sufficiently ductile to be "picked up" by the engraver's tool, yet sufficiently hard to enable the edges of the engraving to stand, without becoming rounded or burred, through long service.

The rolls must be perfectly concentric; they must be straight within close tolerance

**FOUNDED BY  
PAUL REVERE**

1 8 0 1

limits; they must be strong enough to drive a heavy printing cylinder by friction; tough enough to withstand repeated pushing on

and off mandrell; and must have the smoothness and texture required to prevent the edges of the engraving from being eroded by the "doctor" blades.

The standard, most economical, roll is the solid wall copper roll. Rolls of this type can be repeatedly re-engraved, the old engraving being turned off. An average size solid wall copper roll should permit at least 25 such turn-offs, thus affording 26 new engraving surfaces during its life.

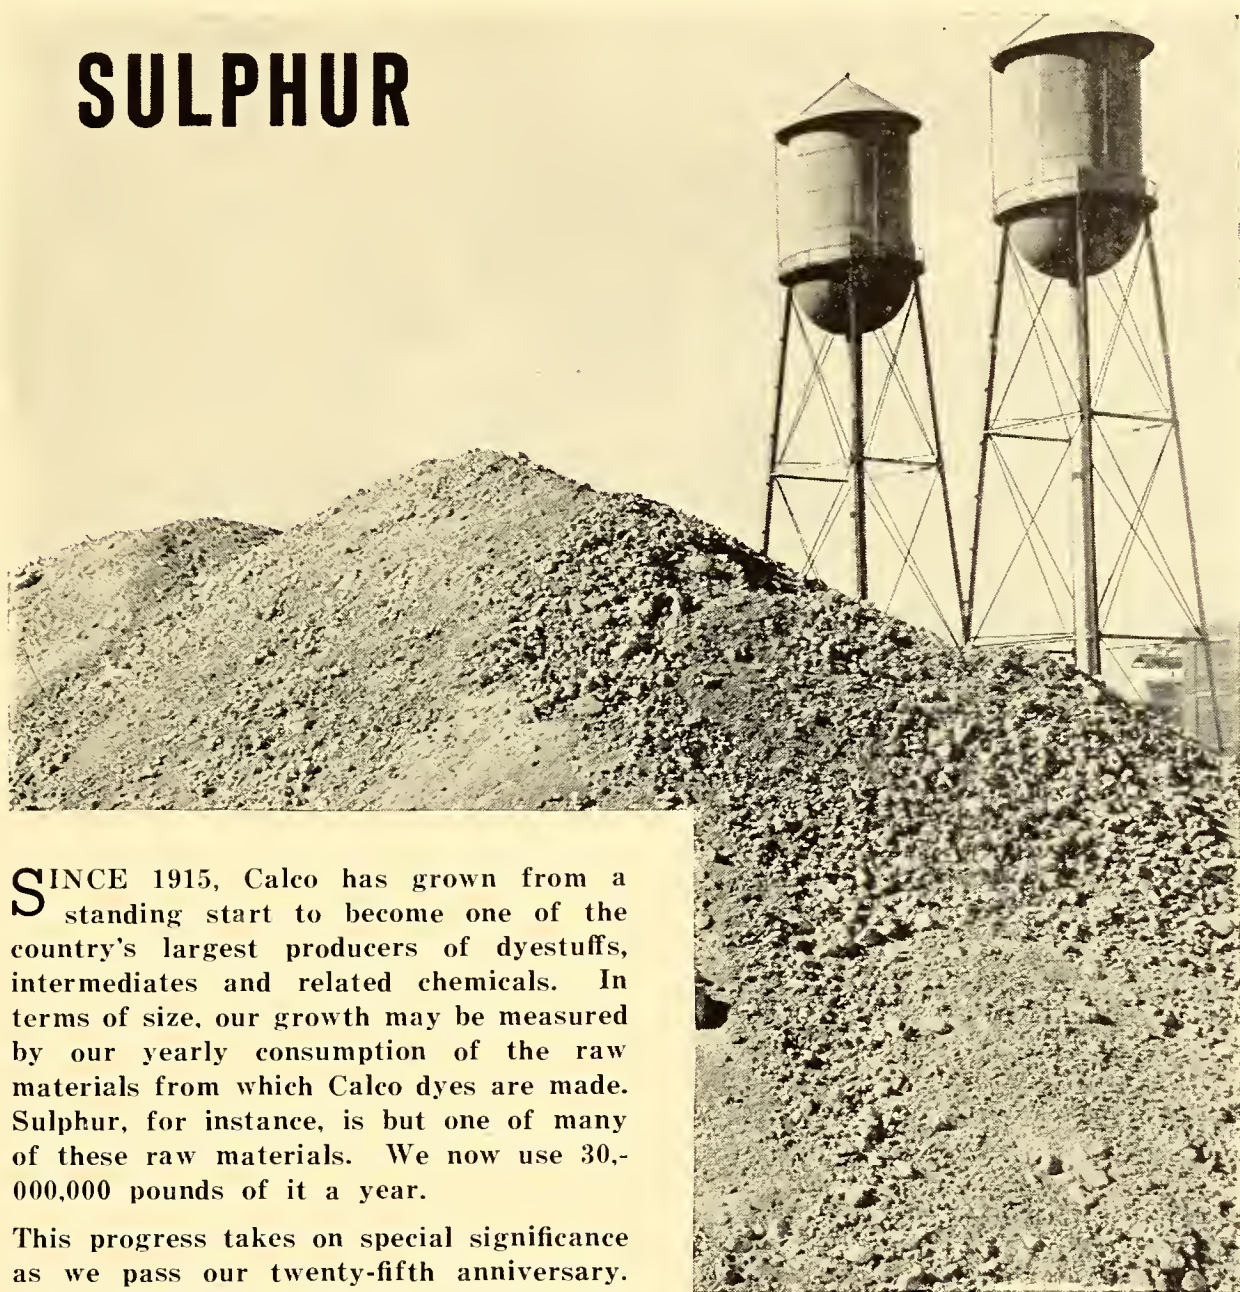

Also available are cheaper rolls, "re-built" by drawing new copper tubes over cores consisting of old turned-down rolls. However, these are more likely to cause trouble, and in the end are definitely more expensive than the solid wall rolls.

Revere specialists with many years of experience in this field are at your service to assist you in specifying and obtaining rolls best adapted to serve your individual requirements. Revere ability to render capable service of this kind is perhaps best attested by the fact that a large proportion of all textile print rolls in use throughout the United States today are of Revere make.

## Revere Copper and Brass Incorporated

# 30,000,000 POUNDS OF SULPHUR

**S**INCE 1915, Calco has grown from a standing start to become one of the country's largest producers of dyestuffs, intermediates and related chemicals. In terms of size, our growth may be measured by our yearly consumption of the raw materials from which Calco dyes are made. Sulphur, for instance, is but one of many of these raw materials. We now use 30,000,000 pounds of it a year.

This progress takes on special significance as we pass our twenty-fifth anniversary. It is typical of the impressive development we have shared with the country's Chemical Industry as a whole. And we are proud that Calco products contribute so substantially to the nation's self-sufficiency of vital materials—not only on the score of quantity, but on the basis of quality as well.

## TROUBLE SHOOTERS

In National Textile Service Laboratories chemists and colorists anticipate and prevent dye house troubles by subjecting fabrics to tests far more rigorous than conditions encountered in actual use. These men, all with years of practical dye house experience, will welcome your dyeing or finishing problems with a warmth of intelligent interest as genuine as their technical skill.

Attached to each principal National sales office is a National Textile Service Laboratory having an unequalled accumulation of test work and technical data. We invite you to use this nearby technical service.
